## EDUCATION

### Specialization: IT Technician

ZST im. Hipolita Cegielskiego

- 09/2015 - 04/2019
- Piła

## SUMMARY

3+ years of experience crafting user-centric web applications across diverse international teams. Skilled in building both SPAs and complex server-side rendered pages using Vue.js and it's ecosystem, with a passion for building accessible and performant user interfaces. Convinced that collaboration is key to successful development.

## EXPERIENCE

### Frontend Developer

Monterail sp. z o.o. OFFICIAL VUE PARTNER

- 05/2022 - 03/2024
- Wrocław/remote

Jumpstarted my career as a junior developer, quickly progressing to a promoted role within the first six months. Demonstrated diverse skillsets through contributions to 4 projects, mainly e-commerce, including exclusive fashion brand.

#### Key achievements:

- developed cross-platform application (web, iOS, Android), working on a single codebase using Ionic framework
- collaborated and communicated with multicultural, international teams of programmers, designers, testers and customers
- enhanced SEO by optimizing structure, addressing duplicate content, or implementing relevant meta tags based on a audit
- ensured digital accessibility (WCAG 2.0 AA)
- contributed to application maintenance
- created a functional prototype (PoC) to validate project assumptions and assess feasibility
- guaranteed consistent and predictable application behavior across various devices and browsers
- worked with Jira and agile methodologies

### Vue Bootcamp

Monterail sp. z o.o. OFFICIAL VUE PARTNER

- 02/2022 - 05/2022
- Wrocław/remote

- participated in daily meetings covering key software development aspects like technological debt, accessibility, SEO, etc.
- developed an SPA application based on specifications and Figma designs using Vue
- collaborated with other developers and the rest of the team on a real-world project for 2 weeks

### Intern Javascript

Auroria sp. z o.o.

- 03/2020 - 03/2021
- Poznań

- developed e-commerce functionality using JavaScript and Vue
- constructed an internal API using Node.js (Express)
- collaborated with experienced developers on real-world projects
- built a warehouse admin panel with Vue Component Framework (vuetify)
- extracted products data by scraping competitor websites with Node.js tools
